

# FLOW-TRONIC SA NV

## NEWS N°1 September 2006

Dear All,

Just a few things to follow:

Sales forecast:

Thanks for those who sent us their forecast.

Flow-Tronic S.A. new logo:

After more than 15 years we decided it was time for change. We're starting to introduce it and we will be rolling it out over the next several months.

Rental Equipment:

As a reminder we have Flo-Dar (21), Flo-Tote 3 (10) sensors with Logger and Flo-Station ready for renting as well as Flo-Mate (2), Sewer-Mag (1 DN150, 1 DN100, 1 DN200, 1 DN80, samplers (1 with 24 bottles & 1 with 5 bottles), raingers (2) and Flo-Tracer (1). Those equipments are available within one week, with shipment at your charge.

Please make sure you promote Flo-Dar and Flo-Tote 3 rentals during every sales call and presentation.

ISO 9001:2000 certification:

We are proud to announce that we succeed the renewal of our ISO 9001:2000 certification. Our certificate is valid until May 2009 with annual audit through AIB Vinçotte.

### Flow-Tronic and Flowbru Websites:

#### [www.flow-tronic.com](http://www.flow-tronic.com)

We are actually working to improve our web site to make the basic commercial and technical information available in different languages.

#### [www.flowbru.be](http://www.flowbru.be)

This is our customer's, the Brussels Ministry, web site. As most of you already know, we won an important market: installation and maintenance of 90 stations on Brussels territory.

This web site is a good tool for presenting a complete net with online data.

#### Sales Meeting in northern Netherland

Ivo Geboers, our Sales Engineer responsible for Netherlands and the dutch part of Belgium, organized a sales meeting on September 12<sup>th</sup>. Very positive feedback.

#### Flow-Tronic team

Mike van der Broek left our company and has been replaced by David Schneider who will reinforce our technical team.
