# IFQ LOGGER 2

## Logger for RAVEN-EYE® 2(+), BELUGA, BELUGA A/V or PHOENIX 2

The IFQ LOGGER 2 is a portable converter and data logger designed for use with Flow-Tronic flow sensors. It is equipped with one RS485 digital serial communication port for **RAVEN-EYE®, RAVEN-EYE® 2(+), BELUGA, BELUGA A/V or PHOENIX 2** sensors, along with a 4–20 mA input for external level measurement.

The IFQ LOGGER 2 with its robust design and versatile functionality, is ideally suited for **inflow and infiltration monitoring, capacity assessment, sewer overflow detection, and sewer studies**, delivering reliable data collection for demanding applications in wastewater and environmental monitoring.

Through direct USB-C communication, the IFQ LOGGER 2 allows quick and straightforward setup and configuration of the flow measurement system. It provides real-time measurements, including velocity distribution and signal analysis, while recorded data can be downloaded conveniently via the USB connection. A built-in local display with navigation using a magnet makes it easy to review the latest recorded values, display alarms, switch between data views, and access key functions such as data recovery in the event of SD card loss or corruption.

The device is built into a rugged **IP67 enclosure** designed to withstand harsh field conditions. Its connectors combine plastic bodies with stainless steal reinforcement, ensuring long-term durability while remaining corrosion free. Power is supplied by one or two 12 VDC – 12 Ah batteries, which are hot swappable thanks to easily accessible connectors that allow quick replacement without interrupting operation.

## Technical Specifications

**Sensor Interface**

1x RS485 digital sensor interface for velocity sensor

| | |
|---|---|
| Compatibles sensors: | RAVEN-EYE®, RAVEN-EYE® 2(+), BELUGA, BELUGA A/V, PHOENIX or PHOENIX 2 |

1x 4-20 mA analog input for level sensor

| | |
|---|---|
| Compatibles sensors: | ULS-02, ULS-06, PLS-02, PLS-06 RLS-15, RLS-C21 or any other loop powered 4-20 mA level sensor with appropriate connector |

**Setup & Operation**

Complete configuration using FUZION software for Windows through direct USB-C communication

Operation with magnet for wake-up, data recovery, alarm, totalizer reset, etc.

Available units:

| | |
|---|---|
| Flow: | l/s, $m^3$/h, $m^3$/s, $m^3$/d, Ml/d, gpd, gpm, cfm, Mgpd |
| Velocity: | cm/s, m/s, fps |
| Level: | mm, cm, m, inch, feet |
| Total flow: | l, $m^3$, g, cf |

Available languages: EN

Advanced features: Q/h curve

**Display & LED**

144x32 pixel black-on-green graphical display with wake-up function.
Two lines of text display: flow, velocity, level, total flow, alarms, time stamp and power supply
Internal battery status indication.
1 status indication LED.

**Logger**

| | |
|---|---|
| External Memory | 32 GB SD card (up to 250 years of data) |
| Internal Memory | 32 MB internal backup memory (up to 4 months of data at one minute logging interval) |
| Real-time clock | Dedicated backup battery |
| Data format available | .tsv & .csv |

**Certification** CE

# Technical Specifications

## Power Supply

| | |
|---|---|
| Battery | One or two 12 VDC 12 Ah lead-acid batteries<br>Hot swapable batteries<br>Autonomy of 3 months (5 min. interval)*<br>Deep discharge protection (max 9.6 V) |

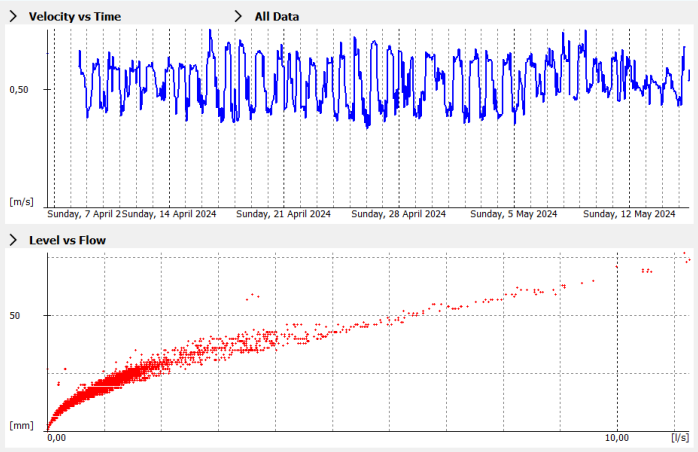
## Enclosure

| | |
|---|---|
| Dimensions | 249 mm L x 318 mm W x 203 mm D (9.8'' L x 12.5'' W x 8'' D) |
| Weight | 9.8 kg (21.61 lb) with two batteries |
| Material | Impact-resistant polypropylene resin |
| Protection | IP67 (when closed) |
| Max. humidity | 90% r.H. (non-condensing) |
| Connectors | Stainless steel reinforced plastic |

## Environmental Conditions

| | |
|---|---|
| Operating temperature range | -20 to +60°C (-22 to +140°F) |
| Storage temperature range | 0 to +45°C (-32 to +113°F) |

## FUZION software data display:



**Autonomy based on fully charged batteries and normal operating temperatures*
